PROFILE

Computer Systems Engineering student creating AI-assisted animation videos, motion graphics, presentations, and website frontends. Uses clear creative briefs, iterative prompting, and visual review to refine content for project needs. Combines creative production with Python and C programming skills. Seeking entry-level opportunities in AI content creation, presentation design, or frontend development.

SKILLS

Creative: AI-assisted video creation, motion graphics, presentation design, visual storytelling

Development: Python, C, website frontend development, GitHub project workflows

AI tools: Prompt development, creative brief translation, output evaluation, iterative refinement

Cybersecurity: Hands-on practice in authorized training labs; SQL injection testing, Burp Suite, and sqlmap

SELECTED PROJECTS

Wahaj - Interactive Brand Presentation | GitHub

- Designed and developed a 29-slide interactive presentation with animations, responsive layouts, and keyboard and touch navigation.
- Produced the embedded promotional videos and integrated English subtitles and transition sound effects.

Wasla Arabic Website Frontend | GitHub

Next.js | React | TypeScript | Tailwind CSS

- Developed an Arabic website frontend with six pages, responsive navigation, and right-to-left layouts.
- Created animated product sections and interactive FAQ components within a reusable UI structure.

Instagram Comment to DM Automation | GitHub

Python | FastAPI | SQLAlchemy | Meta Graph API

- Built a campaign dashboard connecting keyword-matching comments with public and private replies.
- Project includes webhook validation, duplicate-event handling, and automated behavior checks.

Employee REST API | GitHub

Java | Spring Boot | Maven | JUnit

- Built employee listing and insertion endpoints with unit and HTTP tests for the HPE Software Engineering Job Simulation on Forage.

EDUCATION

Al-Azhar University - Gaza

Bachelor's degree in Computer Systems Engineering, in progress

Current standing: Second year | Expected graduation: 2028 | Average: 94.1%

TRAINING AND CERTIFICATES

Web Application Penetration Testing | 30 hours across 15 lectures

SQL injection, safe testing environments, mitigation, and security reporting

HPE Software Engineering Job Simulation | Forage | September 2026

Claude 101 | Claude Academy | September 23, 2026 | Verify

AI Capabilities and Limitations | Claude Academy | September 24, 2026 | Verify

LANGUAGES

Arabic: Native | English: B2+ (self-assessed)
